## **Asbestos In Material Scheme (AIMS)**

### **Round 46 – EM 20**

#### **Qualitative Analysis of Asbestos in Bulk Materials by Transmission Electron Microscopy (TEM)**

Dear Participant,

Please find enclosed your sample for EM round 20 (AIMS 46).

Analysts may need to prepare and analyse the sample carefully to find all of the asbestos components. Please take care when handling samples containing asbestos using the appropriate precautions.

**If you have any concerns regarding the analysis of the sample or the submission of your results, you should notify the proficiency testing team before 3rd February 2012.**

Regards,

Delia Lomas-Fletcher  
AIMS PT Manager

TEM REPORT FORM Round 20 (AIMS 46)

| Sample I.D.                         | Crocidolite | Amosite | Chrysotile | Tremolite asbestos | Anthophyllite asbestos | Actinolite asbestos | MMMMF | Other fibres (identify) | No asbestos |
|-------------------------------------|-------------|---------|------------|--------------------|------------------------|---------------------|-------|-------------------------|-------------|
| R20                                 |             |         |            |                    |                        |                     |       |                         |             |
| Validation Number (please complete) |             |         |            |                    |                        |                     |       |                         |             |
| Comments                            |             |         |            |                    |                        |                     |       |                         |             |
