

**ASBESTOS IN MATERIALS SCHEME (AIMS)
UK LABORATORY CLASSIFICATION REPORT
AIMS Rounds 65-67**

Description of the AIMS Scheme

Asbestos In Materials Scheme (AIMS) assesses the performance of laboratories carrying out the identification of asbestos in bulk materials. The AIMS scheme is operated by HSL, which oversees management, registration, and membership matters together with distribution of the samples and processing the participant data.

UK laboratories are required to be accredited by the United Kingdom Accreditation Service (UKAS) to ISO 17025 to undertake this particular analysis as part of assessing whether materials contain asbestos under the [Control of Asbestos Regulations \(CAR\)](#). Participation in AIMS in the United Kingdom is recommended in the Health and Safety Executive's Guidance - [HSG 248, "Asbestos: The analyst's guide for sampling, analysis and clearance procedures"](#) and is a precondition for accreditation of this analysis to ISO 17025.

Significance and interpretation of classifications

A laboratory will receive one of four classifications – Good, Acceptable, Unsatisfactory or Awaiting Classification – for each period covered by three consecutive rounds.

Good – awarded when the cumulative score over 3 rounds is 7 or less

Acceptable - awarded when the cumulative score over 3 rounds is from 8 to 32

Unsatisfactory – awarded when the cumulative score over 3 rounds is more than 32

Unclassified – reserved for participants awaiting classification (those who haven't completed 3 rounds of AIMS).

This 3 round classification is the primary assessment measure because it reflects the performance of a laboratory over a period of time. The aim of every laboratory should be to achieve and maintain a Good or Acceptable performance in AIMS.

This report lists those laboratories that have achieved a Good or Acceptable Performance. Laboratories are listed in alphabetical order.

Please note that laboratories “Awaiting Classification” and “Unsatisfactory” laboratories are not included in this list.
